EDUCATION

University of California, Berkeley – Haas School of Business
Master of Financial Engineering

Expected March 2027
Berkeley, CA, USA

ENSAE Paris - Polytechnic Institute of Paris
Master of Science in Statistics, Finance and Data Science

Expected upon completion of the MFE
Paris, France

ENSAE Paris - Polytechnic Institute of Paris
Bachelor of Science in Economics and Applied Mathematics

November 2024
Paris, France

Achievements: GPA: 4.0/4.0

SKILLS & CERTIFICATIONS

Programming: Python (Pandas, scikit-learn, TensorFlow, statsmodels), C++, R, SAS, SQL, VBA

Mathematics: Probability Theory, Machine learning, Statistics, Time-Series Analysis, Econometrics, Stochastic Calculus

Languages: English (fluent), French (native)

Certifications: [Machine Learning Specialization](#), [Bloomberg Market Concepts](#), [Bloomberg Finance Fundamentals](#)

PROFESSIONAL EXPERIENCE

UBS Investment Bank
Incoming Off-Cycle Intern – Global Markets, Derivatives & Solutions

Oct 2026 – Jan 2027
New York, NY, USA

- Joining the New York Office to actively contribute to **derivative structuring and trading operations**.

Barclays Investment Bank
Rates Strat Intern

Jun 2025 – Dec 2025
Paris, France

- Relative Value (RV) Strategies:** Researched and backtested SSA bond pair trades using **OLS residuals**; optimized entries using Z-spread, duration, convexity, and repo rates, yielding a **Sharpe Ratio of 1.52** on the SSA desk.
- Alpha Signal Generation (LSTM):** Engineered a Deep Learning (LSTM) model to predict RFQ hit probability, achieving a **0.72 AUC**; generated a live probability matrix by **DV01** and Client Industry (Hedge Fund, Asset Managers...) to optimize skew and capture alpha.
- Systematic Backtesting Framework:** Built a modular Python framework computing core risk-adjusted metrics: Sharpe Ratio (1.4+ target), PnL/trade, daily PnL, carry, average balance sheet, and holding time.
- Trading Strategy Visualization:** Developed real-time risk engines (AG Grid/Charts) providing EM, SSA and inflation desks with instant **DV01 exposure** and **RFQ analytics** to drive intraday liquidity and pricing decisions.

Galileo Global Education
Data Analyst Intern

Jun 2024 – Sep 2024
Paris, France

- Developed Streamlit web apps in Python with automated data cleaning (Pandas) and PDF extraction pipelines (PDFplumber, Tesseract OCR), reducing manual processing time **from 3 days to 20 minutes**
- Developed a neural network-based **NLP model for sentiment analysis** on alumni feedback data to evaluate program effectiveness and enhance educational outcomes at Galileo Global Education.

RESEARCH EXPERIENCE

J.P. Morgan
Quantitative Risk Trading Strategy — Spinoff Index Inclusion/Deletion Arbitrage ([code repository](#))

June 2026 – Aug 2026
Berkeley, CA, USA

- Designed a beta-hedged, market-neutral long strategy on post-spinoff parent stocks, achieving **0.69** Sharpe Ratio.
- Built leakage-free **decision tree and logistic regression models** to estimate index-inclusion probabilities and return terciles, increasing Sharpe from **0.69 to 1.29** via probability-weighted position sizing (nested LOO-CV).

b-cube.ai
Cryptocurrency price prediction and development of trading strategies ([code repository](#))

Dec 2024 – Jun 2025
Paris, France

- Developed a modular trading framework to compare classical time series models (ARIMA, GARCH) with machine learning models (LSTM/GRU, XGBoost, LLMs) for cryptocurrency forecasting. Machine learning models achieved **56% accuracy** on 15-minute return forecasting for 2024, outperforming classical time series models.
- Designed an object-oriented pipeline for multi-asset data ingestion (Binance API), feature engineering, model training, and backtesting; automated real-time predictions with cron jobs
- Live PnL & Execution:** Deployed personal capital in a live environment, yielding a **25% net return** (\$250 profit on \$1k) over 3 months in 2025; optimized for Binance exchange fees and execution slippage.

Interests: Football/Soccer/Badminton/Rugby (**National-level athlete**, 2016–2020)/Chess/Squash/Sailing/Travelling
